

HOSPITAL BOARD HOLD
BUSY SESSION SATURDAY

Pass Resolution to Petition Government, Pointing Out Need of Bridge Across Bow River—Transact Much Routine Business

In a two hour session which began at 2 p.m. Saturday afternoon, Feb. 5, the Bassano Hospital Board put through a considerable amount of business from passing accounts to adopting a resolution to petition the provincial government at Edmonton that a bridge be built across the Bow River south of Bassano.

The meeting was the first since August. The members of the board present were—Robt. McLean, E. F. Mauer, Percy Powell, and W. S. Pollock.

May Change Time of Meet.—P. Powell gave notice that at the next meeting he would move an amendment to the by-laws changing the time of meeting to 8 a.m. to provide for the meetings to be held at 2 p.m. instead of 5 p.m.

Purchase Back Bond

The secretary reported that he had purchased back a \$5,000 debenture at approximately 90. His actions were approved by the board.

\$10,000 Uncollected

A number of uncollected accounts were read, and the secretary was authorized to write them off the books. These accounts amount to about \$10,000, and it is practically impossible to collect. All the people responsible for these accounts have left the district.

Wau Bow River Bridge

The resolution adopted by the board regarding the Bow River bridge reads as follows:

Whereas the Bassano Municipal Hospital District No. 6 includes a portion of Improvement District No. 156 comprising 47.735 acres of an assessable value of \$25,000 according to the 1925 revised assessment, which territory lies south of the Bow River; and

And whereas a number of people from other points outside the said Hospital District, including Miles, Queenstown, Shouldice, Arrowwood, and Vulcan and the hospital, all of which are points south of the Bow River; and

And whereas in the year 1923 the Provincial Government bridge across the Bow River connecting the above said territory with the Town of Bassano wherein the said hospital is located was destroyed by flood;

And whereas the Department of Natural Resources of the Canadian Pacific Railway Company has allowed automobiles and other light traffic to cross the irrigation dam from the Bow River to the south east corner of Bassano since the bridge was destroyed which Company has now given notice that the dam will be definitely closed to public traffic after December 31st 1926.

Therefore be it resolved that the Board of the Bassano Municipal Hospital District No. 6, petition the Provincial Government to build a new bridge across the Bow River at a point, as nearly as circumstances will permit, south to South-West of the Town of Bassano carried unanimously.

Miscellaneous Business

A. L. Fryberger's letter of resignation was read and accepted.

A number of accounts were read and passed for payment.

The contract for the supply of ice was let to Mike Emil at a price of \$25 a ton.

E. F. Mauer was appointed vice chairman in place of A. L. Fryberger, retiring from Dec. 1st, 1926, with authority to sign cheques in the absence of the chairman.

It was decided to remove a partition in the hospital so as to enlarge the babies' nursery and serving kitchen.

All in one week for \$1.25, 75¢ and 40¢

HUSSAR PERCHERON BREEDER,
SELLS FIVE YOUNG COLT

Richard Ballhorn, of Wetaskiwin, was in Bassano last week looking over the new herd of Percherons at the W. J. Hoagland farm, and purchased from Mr. Hoagland the yearling stallion "Afagta" to head his herd of registered Percherons at Wetaskiwin.

Mr. Hoagland started breeding pure bred Percherons two years ago, and now has some fifteen head of registered mares and colts, and is beginning to realize on his investment.

Very gratifying is his belief that the first stallion of his own breeding should go to the head of a pure breed.

Mrs. Bercham spent Sunday afternoon with Miss M. Parrott.

U.F.A. dance Feb. 16 in the Gem school.

Several members of the Gem community are suffering from a slight attack of the flu.

Mrs. E. Sauer was a business visitor on Sunday last.

Stanley Selfridge returned to his home on Saturday last from the Bassano Hospital where he has been an inmate for several days.

During the past week many parties have been given in the Colony honoring Mrs. C. Jones who is spending an extended vacation by her old friends.

A very enjoyable party for the small children on Monday at a birthday party for her little son Gordon.

A. Weisbly is visiting at the St. John's home.

Mr. and Mrs. Roche, Mr. and Mrs. Jeth Royer and family, and Pauline Marques and children, were the guests of Mr. and Mrs. Royal Burrows on Saturday evening and attended by quite a large number of Mrs. Jones' friends.

Wm. Pollock is another guest from the Gem community.

Friday, Feb. 18. Excellent music.

The Burrows family were putting up for Mr. and Anderson last week.

Mrs. May Burrows is much improved in health after an attack of the flu.

A new barn was built at the Burrows home this week.

Mrs. Jones and Eugene were home Saturday evening.

Mrs. Foley's many good friends will be sorry to hear of the death of her mother, Mrs. Herbert, who passed away on Wednesday last in their Calgary home. Sincere sympathy is felt for Mrs. Foley who during the past year has been a constant comfort to her.

Mrs. Chamberlain, of Gem, spent the week-end visiting her sister, Mrs. Ben Wilson, late of Irricana, also her father and mother, Mr. and Mrs. Herbert, of Calgary.

W. A. Goudie and children turned out for Sunday school Sunday afternoon after being absent.

Mr. and Mrs. Royal Burrows and family are preparing to move to Canmore where they have invested in a farm. The Burrows brothers will start next week with the stock which they are going to drive overland.

Mrs. Stringer has been quite ill with the flu.

Miss Bingham and Mrs. Suss were dinner guests at the Anderson home Monday evening.

Mr. and Mrs. A. M. Anderson and Mr. and J. E. Keir and family.

The dance Friday evening was well attended.

It was a fast game from the start, and both teams displayed good skill and good sportsmanship.

With a few minutes to go in the first period, the Sheiks launched a terrific attack on the Gleichen defence.

In the battle around the Gleichen goal Artie Simpson was the pick and he was a terroristic force in the opening counter.

Artie Simpson scored three of the Sheiks' six goals and Jakey Bulmer accounted for the other two.

The Gleichen boys will play the Sheiks in Bassano on Friday evening this week, Feb. 11.

SHEIKS DEFEAT
GLEICHEN BOYS

Local Juniors Play Good Hockey to Draw Glorious Team

The Bassano Sheiks outplayed the Gleichen team last Friday in Gleichen to win a hard fought game by the score 5-4.

It was a fast game from the start, and both teams displayed good skill and good sportsmanship.

With a few minutes to go in the first period, the Sheiks launched a terrific attack on the Gleichen defence.

In the battle around the Gleichen goal Artie Simpson was the pick and he was a terroristic force in the opening counter.

Artie Simpson scored three of the Sheiks' six goals and Jakey Bulmer accounted for the other two.

The Gleichen boys will play the Sheiks in Bassano on Friday evening this week, Feb. 11.

BIRTHS

At the Bassano Hospital To Mr. and Mrs. E. Jones, of Majorville, a daughter, on Friday Feb. 4.

To Mr. and Mrs. E. Heryford, a daughter, on Sunday, Feb. 6.

To Mr. and Mrs. S. Sutor, of Milu, a daughter on Monday, Feb. 7.

"THE CANADIAN"

"The Canadian" is a real Canadian picture, and was filmed by the Paramount people at Calgary. It is a vivid drama of the great Canadian west in which a girl who is accustomed to the life of a city girl is suddenly transplanted into the Canadian wheat fields and the clean outdoor life of the farm. How she meets a horny handed son of the soil and how she gradually learns to respect and finally love him makes most interesting themes for a picture.

WIN PRIZES FOR
CHARLESTON

Miss Patsy Hunter won the girl's prize and Lloyd Leonard won the boy's prize in the Charleston contest put on in the Gem Theatre last Friday evening. Miss Patrick and Miss Flora were the judges.

BASSANO, ALBERTA

Subscription \$3.00 a year, \$25.00 to the United States

FOR ANOTHER
YEAR

The Bassano town council of 1926 will hold offices for another term. The three retiring councillors have been re-elected by acclamation, and the personnel of the council remains the same as last year.

This is well. The council has proved itself an efficient and capable one.

The mayor and members of

the council have paid diligent attention to the duties of managing the business of the town.

The council has set in motion certain progressive legislation and plans for the liquidation of the town debt, the building of an irrigation project and other plans. The present members of the council are familiar with their work, and are perhaps better fitted to carry it to completion than new councillors would be.

Bassano is now on the way to recovery of its financial stability, and if the council carry on with the work they did in the new year, the town's affairs will be well managed.

SHOULD BUILD HIGHWAY

There are a number of arguments in favor of extending the government highway south from Strathmore to Husar and then southward to Bassano.

Chief of these arguments is that the road, if built through the Husar area, would serve a greater number of people, and thus be of greater general service to the public, if it would be if carried southward through the Cluny district along the line of the old survey.

The old survey runs through and adjacent to the main road, and could easily be made to run through the road, but little traffic to the highway. The road along this route is of a sandy nature, not the best kind of material for road building.

The proposed route through Husar has the advantage of passing through the town, and will be as a route highway for a small section of the town. This road along the route is good material for the building of roads, and if the roadway is eventually paved with gravel this will be available for traffic, on the same railway line and no great distance from Husar.

One of these that might be mentioned is the barometer. This instrument measures the pressure of the atmosphere, and is ordinarily thought of in connection with weather. But differences of atmospheric pressure are also associated with differences of elevation. This principle is utilized to determine elevations of points above sea level, a matter of such vital information in topographic mapping. Much difficulty was experienced in devising a method of using readily carried barometers and in minimizing the many errors to which such an instrument is subject. However, the difficulties have been largely overcome, and the improved barometer has accordingly been used in a number of years by the Topographic Survey Department of the Interior in certain classes of topographic mapping.

As another instance, shortly after semi-settlement when the great areas of western Canada began to be opened up, our country was confronted with the problem of mapping the rugged areas of the Rocky mountains. Here the usual methods of mapping were impractical and expensive, and new methods had to be devised. In casting about for these, cameras were seized upon, and by applying the principles of aerial photography to the latter, Dr. E. G. Beale, surveyor general of Canada, methods which in their development were highly technical but in their application quite simple, this work went satisfactorily ahead. There might not appear to be any connection between the art of taking pictures and that of mapping the country, but the method evolved, namely that of photo-topographic mapping, has since been used in all parts of the world. In this method photographs are taken of the terrain, and the points of high points offering commanding views, and by an inversion of the principles of perspective, these photographs are translated into topographic maps.

The recent application of the aeronautical camera to the surveying of mountainous terrain is fairly generally known. When man began to fly with a reasonable degree of success, it was not long before the possibilities began to be considered of substituting the moving aeronautical camera for the stationary mountain peak as a support for the surveyor's camera. By so doing the method could be applied to other

An' "spout" she's Scotch for de-bug talk,

Wat's wat I understand,

I spout de way I feed."

Jolly baled hay wire, trusty old friend

How many a break you have helped

Me to mend.

How many a sleigh tongue You've

Spotted me a spiced.

Or a split in my axe handle fixed

In a trice.

Should a link in my chain perchance break in two,

A piece of baled hay wire would make

one again;

Or if my old harness should sever in twain,

A stitch of baled hay wire would

Join it again;

Or if from my sheepkin the buttons

Should sever.

And in the blasts of the cold

Winter weather,

A small piece of wire would the damage repair.

And shut out the chill of the cold winter air.

Or should old pipe be unwilling

To mend,

I take from the hay wire would

Clear out the choke;

So jolly old hay wire, trusty old friend,

I never will forget how you helped

me to mend.

BEGINNING THE VEGETABLE GARDEN

(Experimental Farm Note.)

In beginning a vegetable garden one should insure it against its natural enemies, such as birds, rabbits, deer, and other animals. At the experimental farm at Borden, Ont., we were of such size by 1916 that the garden enclosed by them has not been followed since and has borne a good crop of vegetables every year. A distance between the hedges running north and south and our outer boundary and west of two hundred feet is quite effective against wind and drifts.

MOISTURE IN THE INCUBATOR

In the drier sections of Canada, and especially where low temperatures prevail in early spring, great difficulty is experienced in getting good hatches, due to an insufficiency of moisture in the incubator. In many cases, in spite of ideal moisture conditions in the incubator room itself, poor results are still the rule and the percentage of chicks dead in shell is very great. It has been found that any considerable decrease of the normal moisture content of the machine causes the air to draw too much moisture from the egg with the result that the shell membrane becomes brittle and dry and is easily broken by the chicks in the time of hatching. Under such circumstances it is essential that moisture be supplied liberally if a normal hatch is to be obtained.

By far the most important method of assuring a sufficient supply of moisture in incubation is that of supplying water by some means to the nest itself. It is absolutely necessary in incubating to correct humidity in an incubator that some accurate method of recording the relative humidity of the machine employed and the simplest method is to use a wet-bulb hygrometer. A relative humidity of from 50 to 60 per cent has consistently given the best results in the experimental farm system. It is better to err on the side of too much than too little moisture.

One method in general consists in placing water pans or trays of wet sand in the bottom of the incubator. Under ordinary circumstances sufficient moisture is supplied to the eggs by the water which was carried out at Lethbridge and at the Central Experimental Farm, Ottawa in which moisture was supplied by using pads made of thin boards wrapped to a thickness of about one inch, with cheese cloth or burlap, dipped in water and suspended above the eggs. The relative humidity was measured at the frequency of reading the pads. Since the air above the eggs is hotter than below, its capacity for absorption of moisture is greater, and the maximum amount of moisture should be supplied at that point. The slightly cooled and moist air which is constantly being sent to the bottom of the incubator and a fresh supply of hot air is constantly running in contact with the pads. The eggs being surrounded with moisture laden air, grow.

The building will have 21 stories above the street level and two below; four stories above the mezzanine level of the passageway, owing to the receding of upper stories from the street line. The building will be 100 feet wide, 100 feet deep, and 350 feet high. The exterior walls will be of Niagara limestone, and the first floor will be used, while Montreal granite will be used for the base of the tower. The massive base of the building will be occupied by the Main City Bank in the lower stories, and the upper stories will be occupied by the various offices of its Head Office. On the ground floor will be the main banking room, and in the upper stories will be the vaults, there will be massive vaults constructed to give the maximum of protection. The first floor will be the mezzanine, the first of these will be occupied by a cafeteria, the second by a large hall for the Bank staff. The second mezzanine and the first floor above will be given over to the Bank's telephone and telegraph departments, including the Telegraph Department, from which private wires extend to the various telephone exchanges, such as New York and Havana. The second floor will be occupied by the President, General Manager and the other officers of the Bank, and other departments.

After the main section of offices, the exterior of the building will be used for the Board Room and Directors' Room, will be for the Board of Directors. The picture shows the building as it will appear from St. James Street, with the main entrance on the left, and the entrance arch will be deep and finely set, proclaiming an atmosphere of dignity and importance.

In the banking room, reached by gently-ribbed, spacious steps, the ceiling will be of fine wood paneling, and will extend the full length of the room at a large window at either end. On the floor will be a large carpet, which will enclose the mezzanine floor, will be carried over a series of arches opening into the various rooms, all panelled in rich polychrome. In the more open and lighter spaces same name bandolines will be repeated.

less of their moisture to the air and a more nearly normal hatch is the result.

At Lethbridge relative humidity in the incubator was increased from

30 per cent with moisture pans only, to 50 per cent with pads above the eggs and the percentage of eggs hatched from 42 to 76 per cent respectively.

WORLD HAPPENINGS BRIEFLY TOLD

There are 143,500,000 people in Burma, according to preliminary official estimates. This is more than the population of Canada, which is 13,500,000.

The Suez Canal wheat load has taken up a thousand building permits for a drying plant at its terminal elevator in Port Arthur.

General Sir George W. A. Hickox, who was promoted for his service in the Crimean War, is dead at his residence at Gosforth, Merton, on Thursday.

Thousands of a supposed new comit of the English aristocracy are summoned in a cablegram received at the Harrow Observatory from the astronomical clearing house in London. It is called Bell's comet.

Twenty seven rebels have been executed by the military authorities in Okavango City in reprisal for the massacre of a small Federal column which was ambushed by rebels in San Miguel, Grands on January 12.

The Suez Canal, which was announced in November in November by the City of London corporation, has decided to offer to the Dominion of South Africa the lease of a portion of South Africa.

So many cold migrants are heading for Ethiopia that the government on the Lower Nile has issued a decree that the direction of the Donkey project have threatened to suspend work in that do not cease.

Aerial passenger service between Rome and Vienna has been opened, making possible a direct flight in a three hours span of 1,000 miles. The aerial link between the two capitals will occupy only six hours against 23 hours by train.

Great interest on the discontinuation of the mail which has been the right of the post office between the Alpine and Germany has been reached and there are no indications to be turned over to the League of Nations.

The Supreme Court of Canada has issued a writ of mandamus against the Tax Act of 1923 of Alberta as invalid.

The appeal of Alberta Collieries Limited to the King on the question of the validity of the tax is allowed.

Both sides in the dispute are also involved with rights in the Supreme Court of Canada and the appellate division of Alberta.

Official Weights Are Lost

Put Away for Safe Keeping Cannot Now Be Found

Lost the standards of Canadian commerce.

Somewhere in Ontario, probably in some obscure corner of a dusty vault in a great iron bound chest which it took to the safe to keep it from being the official weights and measures of Canada. With elaborate ceremony the standards received from England in 1874 were given in trust of the command back in the seventies and eighties. They were safe and secure, tamely were well hidden for today Mountie police agents of the government and House of Commons protective service officers are searching for without result for the valuable weights.

Hubby—Kind hearts are more than ethereal.

Wife—Why, Henry, that's right. It's kind hearts are more than cornets.

Hubby—Well, I know it was some kind of a musical instrument.

Every girl should know how to fit in order to be able to refrain from doing no.

Consumption of hand liquor in Germany last year was only one-third that of pre-war times.

When a man proposes he doesn't seem to realize that it may result in his losing control of himself.

W. N. U. 1667

Is Universally Known

Prince of Wales Attracts More Attention Than Any Other Person

"He is talked of in places where the great war was never more than a memory. In India I have seen the eyes of a wild Afghan gleam with interest at the mention of his name. A group of naked Baratooi hunters around a campfire in the dark would stop to listen to me as I related a legend of his hunting prowess. I saw his photograph hanging in the mud hut of a Bedouin chief in the Sudan. I could hear the snatches of postcards of him from the bazaars of Egypt and I heard some one shouting his name fantastically on a traffic post.

At a dinner party in a villa on the Bosphorus I asked by Turkish host to interpret the subject of an easel painting which was in progress on the table. The artist, a Frenchman, had quoted from the first chapter of "H. R. H. A Character Sketch of the Prince of Wales," by Major F. E. Vansittart, in his reply to my question. In the United States, which though less remarkable, supports the statement that the prince attracts more interest than any living person.

Tramp Steamers Disappearing

Are Being Gradually Replaced by Scheduled Ocean Liners

Tramp steamers, picturesquely known as the sea's vagabonds, are on the way to ocean liners on sailing on to replace the regular schedules.

It is said that the country can afford pastures for at least 3,000,000 animals.

Is Now Important Industry

Cost of Raising Bananas in Alaska is Very Low

More than 550,000 bushels, distributed in 100 heads, are now being kept in Alaska, according to statistics and thirty three and forty five per cent. are now being sold for five per cent. annually. Within the last year Ontario, especially the Kitchener-Waterloo area, has become an important industry. They are known as "water" producers, used for food, clothing and for transportation, and the cost of raising the dog teams for hauling the cost of producing averages only about \$1 a acre for each head, while prices of \$10 to \$12 are realized in the bushy markets. Between 1918 and 1925 nearly 1,000,000 bushels of bananas were exported from Alaska.

The government is endeavoring to improve methods of control and management of land and the grazing facilities are now so good that the country can afford pastures for at least 3,000,000 animals.

SICK CHILDREN
LOVE "CASCARETS"
FOR THE BOWELS

Give "Candy Cathartics" for a bad cold, sour stomach, constipation

Get a ten cent box.

Most of the ills of childhood are caused by a sound disordered stomach. The body in conditions of life, like the cold, cold easily, becomes lethargic, irritable, feverish, restless, and needs a gentle cleaning of the bowels. The doctor tries to force a laxative, but the patient, who is already sick stomach, is forced needlessly and often has a relapse.

The greater marvel I immediately the ability of the urban community to produce a new and better product, the agricultural over product, to be controlled because there is a limit to food consumption. The result over production is more difficult to visualize, than to realize, the sighted man, who has a good knowledge of the little one's system, sweeten the bowel and give the liver and bowels a helping hand.

Full directions for children and full directions for children in each package.

McGraw-Hill Book Company, 360 Madison Avenue, New York, N. Y. 10017. Price 10 cents a box.

Agriculture in B.C.

Farming Population Has Doubled Within Ten Years

There are 22,000 farmers in 1930.

Colombia has 1,000,000 farmers, 900,000 according to the Hon. F. D. Barrow, Minister of Lands. He pointed out that the farm population has doubled in ten years, and that within the same period the number of agricultural products has increased.

Total farm production rose during the ten year period of 1915 to 1925 from \$21,000,000 to \$6,000,000.

It is a conservative estimate that each seat kills twenty-five pounds of salmon every day, twenty-five pounds of salmon is equivalent to the price of a large house and small wagon, and is in size, 18 to 20 years. Size 18 (36 inches) or 25 yards 21 inches, and a yard 26 inch lining, a yard tail.

Home sewing brings nice clothes within the reach of all, and to follow this up, the government has done so easily and economically by following the style pictured in our catalogues. The pattern book has been remarked by English speaking people, with an air of patrocinio. Department and furniture stores now advertise articles for "home" and newspapers use this word as a caption for domestic and women's news.

Canada's
Urbanization

(By C. W. Peterson)

The suspicion rambles in the minds of thinking people that insufficient attention is devoted in Canada to the problems of our countrywide compared with the United States, and the unwise adopted a resolution, urging that "construction of the Hudson Bay railway should be carried on without interruption, so that the line may be completed to Nelson and work commenced on the port terminal during 1926."

O. D. Hill, Liberal, Melfort, sponsored the resolution. "It would be futile to build the railway to the west without providing facilities there to make it pay," he said.

The heavy report presented to the house of commons by Mr. Dunning estimated that 10,000,000 bushels of grain would have to be handled to cover operations in 1926, and to provide an interest of 12% on \$2,000,000 production in the Cartier River valley would be sufficient to cover the estimated requirements."

Mr. T. M. Anderson, Conservative, of St. Albert, recommended the resolution and said the construction of the railway was a national enterprise.

Dr. J. T. M. Anderson, Conservative, of St. Albert, recommended the resolution and said the construction of the railway was a national enterprise.

Plausible explanations of this phenomenon are offered. The favored one is that the increased mechanization of agriculture is displacing men and horses and that areas where men won't work are those where the soil has been even more suitable for urban industry, which might not unnaturally be supposed to release an even greater number of men for other pursuits. There are, however, adequate reasons for this apparent development. The simple story is that life in the town is less laborious, is better paid, is more interesting and amusing, gives more leisure hours, provides greater personal and social contacts.

In short, in spite of all the "high fiddle" theories about the occupation "fed by the heart of earth and sweetened by the arts of heaven," the farm, being generations behind the town in conditions of life, can only compete with it. That is all that is said to this apparent social movement.

The greater marvel I immediately the ability of the urban community to produce a new and better product, the agricultural over product, to be controlled because there is a limit to food consumption. The result over production is more difficult to visualize, than to realize, the sighted man, who has a good knowledge of the little one's system, sweeten the bowel and give the liver and bowels a helping hand.

Seals Destroy Salmon

Traders in North Pacific Facing Difficult Problem

Which is the more valuable, the seal or the salmon? Which is more easily dispensed with by the Indians? Which one, if threatened with disappearance, would be more difficult to replace?

In the Pacific, which has arisen in the North Pacific as a result of the claims of traders that fur seals are decimating the salmon, most important of all food fishes in that part of the ocean, the seal is the chief culprit. Enforcement of the pelagic sealing treaty in 1931, pegging the price of salmon to \$1.50 per pound, has arrested, except in the case of Alaska, where the slaughter is under the close supervision of the United States government. It is estimated that this protection has permitted the price of salmon, trade and finance, with the development of new forms of industrial, financial and commercial organization, the chief concern of the economic life in the factory, the office and the bank, to increase from \$1.50 to \$2.00 per pound.

It is a conservative estimate that each seal kills twenty-five pounds of salmon every day, twenty-five pounds of salmon is equivalent to the price of a large house and small wagon, and is in size, 18 to 20 years. Size 18 (36 inches) or 25 yards 21 inches, and a yard 26 inch lining, a yard tail.

Want Bay Road Completed

Discussion is Discussed at Some Length in Saskatchewan Legislature.

In a debate featured by a complete absence of party politics, members of the Saskatchewan legislature, in their annual session, adopted a resolution, urging that "construction of the Hudson Bay railway should be carried on without interruption, so that the line may be completed to Nelson and work commenced on the port terminal during 1926."

O. D. Hill, Liberal, Melfort, sponsored the resolution. "It would be futile to build the railway to the west without providing facilities there to make it pay," he said.

The heavy report presented to the house of commons by Mr. Dunning estimated that 10,000,000 bushels of grain would have to be handled to cover operations in 1926, and to provide an interest of 12% on \$2,000,000 production in the Cartier River valley would be sufficient to cover the estimated requirements."

Mr. T. M. Anderson, Conservative, of St. Albert, recommended the resolution and said the construction of the railway was a national enterprise.

Plausible explanations of this phenomenon are offered. The favored one is that the increased mechanization of agriculture is displacing men and horses and that areas where men won't work are those where the soil has been even more suitable for urban industry, which might not unnaturally be supposed to release an even greater number of men for other pursuits.

**The Best Laxative
He Ever
Tried**

Mr. W. J. Dorion, New York, writes: "Sick headache, indigestion and constipation have troubled me for years. I tried everything but I can truthfully say your CARTER'S LITTLE LIVER PILLS are the best laxative I have ever used. I find that they are small, easy to take and act quickly. I have never had any side effects.

CARTER'S LITTLE LIVER PILLS are sugar coated, small, easy to swallow and effective. The family can take them in perfect confidence as they are a doctor's formula.

CARTER'S LITTLE LIVER PILLS in red packages 25c. and 75c.

Had to Advertise Telephone

Inventor Had to Distribute Bill Bills to Attract Crowd for First Exhibition

Less than a year ago, there were people who solemnly believed that speech could not be transmitted over the wire. And when Prof. Alexander Graham Bell was giving an exhibition of his telephone at the Kachin chiefs of the district known as the Triangle announced:

"Henceforth slaves must not be sold, as part of dowers or in inheritance, as families of slaves will break up."

Immediate arrangements will be made for the release of slaves and compensation will be paid to the owners by the British Government.

It was estimated that 5,000 slaves will thus become free citizens.

Freeing Slaves in Burma

British Government Issues Order and Promises Compensation to Owners

The British Government has ordered the release of slaves in Burma.

Sir Harcourt Bell, Governor of Burma, at a reception in the Kachin chiefs of the district known as the Triangle announced:

"Henceforth slaves must not be sold, as part of dowers or in inheritance, as families of slaves will break up."

Immediate arrangements will be made for the release of slaves and compensation will be paid to the owners by the British Government.

It was estimated that 5,000 slaves will thus become free citizens.

Alberta Oil Production

Alberta's petroleum production will be 100,000,000 barrels in 1925, which all return are in accordance to Government estimates. This compares with 150,000 barrels in 1925. The production of Royalite No. 4 well, in Turner Valley, exceeded 190,000 barrels for the year up to November 30th, the average production being 52,000 barrels of asphalt per day.

McGraw's picture was first presented at Kester & Blaik's music hall in this city, when Edison's wife was used to throw pictures on a screen.

Warden—What? You back again?

Conklin—Yes. Any letters or packages for me?"

Old Lady—"Don't you friends ever come to visit you?"

774—"No, they're all here with me."
